EDUCATION

Bachelor of Science in Information Technology Major in Web Development

Holy Angel University, Angeles City Relevant Coursework: Web Systems and Technologies, Mobile Programming, Object - Oriented Programming

CERTIFICATIONS

Responsive Web Design (FreeCodeCamp)

- Completed approximately 300 hours of intensive coursework covering HTML5, CSS3, Flexbox, CSS Grid, and responsive design principles.

Back End Development and APIs (FreeCodeCamp)

- Comprehensive training in server-side programming, focusing on building scalable RESTful APIs and microservices using Node.js, Express, and MongoDB.

JS Algorithms and Data Structures (FreeCodeCamp)

- Solved complex algorithmic challenges and implemented core data structures while adhering to modern ES6 standards.

SOFT SKILLS

- Problem solving
- Ability to work under pressure
- Team collaboration
- Patience
- Adaptability
- Time-management

CAREER OBJECTIVE

Aspiring Web Development professional passionate about solving real-world problems through technology. Highly motivated to apply my academic background in Server-Side Scripting and RESTful API Architecture. Committed to continuous learning and eager to grow within a forward-thinking team focused on innovation and AI integration.

EXPERIENCE

Student Aide (HAU STORE) Holy Angel University
December 2025 – June 2025

- **Resolved customer inquiries during peak university hours:** Demonstrating composure under pressure and ensuring rapid service delivery for students and staff.
- **Streamlined customer service for university stakeholders:** Strengthening ability to multitask and remain calm in high-stress situations.

Student Aide (University Library) Holy Angel University
June 2025 – Present

- **Resolved student inquiries regarding research tools:** Improving communication skills and problem-solving in a service environment.
- **Processed check-in/check-out transactions for daily users:** Ensuring accurate record-keeping and reliable service delivery.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), PHP, SQL, Java, Python, HTML5/CSS3

Backend Engineering: Node.js, Express.js, RESTful API Architecture, JWT Authentication

Frontend Frameworks: Vue.js, Angular, Responsive Web Design

Database Management: MongoDB (NoSQL), MySQL (Relational), Database Normalization

Tools & Platforms: Git/GitHub, Postman (API Testing), Visual Studio Code, Figma

PROJECTS

Centro Café – E-Commerce Microservice Architecture

- Architected a scalable RESTful API using Node.js, Express, and MongoDB to handle dynamic product data.
- Integrated a reactive Vue.js frontend to ensure real-time data synchronization and high performance.

Delivery Agent Management System (Java | Backend-Focused)

- Engineered a robust Java backend utilizing Object-Oriented Programming (OOP) principles to manage agent profiles and delivery status.
- Implemented efficient data structures to optimize task assignment logic and streamline the tracking of delivery operations.
